A RESEARCH PROJECT SUBMITTED IN PARTIAL FULFILLMENT FOR THE AWARD OF BACHELOR OF SCIENCE DEGREE IN ENVIRONMENTAL HEALTH SCIENCES, DEPARTMENT OF PUBLIC HEALTH, MOUNT KENYA UNIVERSITY.

OCTOBER, 2014,
ABSTRACT

The term solid waste means: material such as household garbage, food wastes, yard wastes, and demolition or construction debris. It also includes discarded items like household appliances, furniture, scrap metal, machinery, car parts and abandoned or junk vehicles. (Kaleli, 1990)

Mostly The owners, operators, and/or occupants of any premises are responsible for the satisfactory and legal disposal of all solid waste generated or accumulated on their property. All solid waste must be stored in a safe, sanitary and nuisance free manner. Garbage must be stored in sturdy, waterproof, animal-proof containers with tight fitting lids; it has to be removed at least every other week. Accumulating solid waste and storing it outside in plastic bags, trailers or pickup trucks is not acceptable. (UNDP, 2011)

Waste can be classified in several ways but the following list represents a typical classification of solid waste.

- Biodegradable waste: food and kitchen waste, green waste, paper (can also be recycled).
- Recyclable material: paper, glass, bottles, cans, metals, certain plastics, fabrics, clothes, batteries etc.
- Inert waste: construction and demolition waste, dirt, rocks, debris.
- Electrical and electronic waste, electrical appliances, TVs, computers, screens, etc.
- Composite wastes: waste clothing, Tetra Packs, waste plastics such as toys.
- Hazardous waste including most paints, chemicals, light bulbs, fluorescent tubes, spray cans, fertilizer and containers
- Toxic waste including pesticide, herbicides, fungicides
- Medical waste.

The chief primary steps in waste management are generation, collection, sorting and separation, transfer, and disposal. These are Activities in which materials are identified as no longer being of value and are either thrown out or gathered together for disposal. (Public health hand book Third edition)
