A RESEARCH PROJECT SUBMITTED IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE AWARD OF BACHELOR OF COMMERCE DEGREE (ACCOUNTING OPTION) TO THE MT KENYA UNIVERSITY

MARCH 2014
ABSTRACT

The purpose of this research project was to investigate the challenges of efficient management of financial institutions in Kenya. The specific objectives were to establish the effect of managerial skills, employee relations, and performance on the efficient management of financial institutions in Kenya. The beneficiaries of the study included Miliki Society staff, government of Kenya, financial institutions, and future researchers. A descriptive research design was used, where formulation of important principles of knowledge and solution to significant problems. They involve measurements, classification, analysis, comparison, and interpretation of data. This method was preferred by the researcher since it allows an in-depth study of the case under investigation. The research targeted a population of 48 staff members of Miliki Savings and Credit Society Limited; the population was divided into distinct characteristics groups that included branch manager, operation manager, branch supervisors, system administrator, loan officers, tellers’ administrator, and support staffs. Thereafter, the researcher gave the report on the findings and made the recommendation after the investigation has been carried out. A census was used to enable the use of the entire unit. Questionnaires were administered to all respondents. The data was analyzed by the use of statistical tools and presented using figures and tables.

The research findings indicated that managerial skills affect efficient management of financial institutions in Kenya at 85%, employee relations affect efficient management of financial institutions in Kenya at 75%, and performance affects efficient management of financial institutions in Kenya at 81%. They all pose a great challenge to efficient management of financial institutions in Kenya.

The study recommended that the stakeholders and managers acquire managerial skills and knowledge on how to manage financial institutions; this can be done through training, workshops, and seminars which should be carried out frequently so as to enable them acquire job-related skills to facilitate efficiency in the organization. Government policy should be formulated to rid off unscrupulous financial institutions in Kenya.
