ABSTRACT

The main purpose of this research is to study and identify factor that have influenced cheating of exams among students in high school Kaiti zone Makueni County. The researcher will give the questionnaires to the teachers and the students. This will ease collection of data hence more information will be found. The researcher will use case study, the sampling method such as stratified sampling since the examination has been selected. The best method to evaluate the learned content. Certain factors such as exam oriented curriculum peer influence, being afraid to fail lack of self confidence, and many others have been the major causes.
