## **ABSTRACT**

This study was concerned with how the parents' involvements improved learning. Learning is the acquisition of knowledge or skills through experience, practice or study, by being taught.

This study was conducted at Magarini district in Kilifi County. It was conducted in selected or sample secondary school to represent others since it was hard to visit all secondary schools in the area.

The purpose of the study was to highlight the ways parent involvement improved learning in current time and in the later years. The researcher used cross section research and questionnaire which gave more accurate results since his research method was intended to study teachers at different levels and some parents.

The researcher used questionnaire which was semi-structured with both open ended and closed questions. The researcher also used interviews where applicable. The secondary resources e.g. score sheets to verify the data given. The data was later analyzed and presented by use of tables and bar graphs.
