## ABSTRACT

Due to poor academic performance experienced by the students in primary schools in Kiambu town, the researcher aims at investigating the causes that attribute this problem.

The researcher will be guided by specific objectives; main causes of poor performance in Kiambu country, ways of improving performance in the same county and instances when insightful learning can be applied at home and in the classroom.

The research will use the quantitative research design to collect data. The researcher's target population is a primary school in Kiambu County where random sampling technique will be applied to select participants. The researcher will mainly focus on the major causes of students' poor academic performance of Kamelechu primary school in Kiambu County. Data collection tools will be a survey questionnaire.
