## ABSTRACT

The purpose of this study was to determine the factors influencing the supply of petroleum products in Kenya. The study was to investigate the effect of infrastructure as an influence to the supply of petroleum products in Kenya, the impact of availability of foreign exchange to the supply of petroleum products, to determine how management is an effect to the supply of petroleum products and to investigate the effect of refinery capacity to the supply of oil products. The study was to benefit among others the National Oil Corporation, other researchers and the government of Kenya. The researcher viewed literature using all the independent variables of the study. Various literatures were reviewed concerning the topic of study. The study design adopted was descriptive study design which gave the researcher an opportunity to describe the categories of study chosen. The target population of the study was 120 employees of which a sample of 50 employees was chosen. Data was collected through the administering of questionnaire to the respondents. Quantitative and qualitative techniques of data analysis was used to collect data and the findings presented through charts, tables and graphs for simple understanding of the findings. Data was later analyzed using quantitative and qualitative method of data analysis. Out of the findings the study gave conclusions and the recommendation. The study from the analysis also advise on the other studies that are necessary to cover the gap.
