**A RESEARCH PROJECT SUBMITTED IN PARTIAL FULFILMENT OF THE
REQUIREMENT FOR THE AWARD OF A POST GRADUATE DIPLOMA IN
EDUCATION OF MOUNT KENYAUNIVERSITY**

OCTOBER 2012

ABSTRACT

The study sought to investigate the effects of the subsidized secondary education on academic performance in Kirinyaga Central Division of Kirinyaga District, Kirinyaga County in Kenya.

This study sought to know how learning environment has changed with introduction of subsidized education in public secondary schools. It investigated whether the quality of education has suffered on scrapping of tuition fee. To achieve this, the researcher investigated academic performance in respect to staffing, teachers' motivation and roles of parents in their children's education.

The study hopes to demystify the expectations and views about subsidized secondary education.
