University**

MARCH 2015

ABSTRACT

The purpose of the study was to investigate factors disposing youth to conflict; a case of Garissa County. Five research objectives were formulated to guide the study. The research design used in this study was descriptive survey, which is a method of collecting data by interviewing or administering a questionnaire to sampled individuals. The sample of the study comprises of 25 youth group administration and 105 youth groups members. Data will be collected using questionnaires and will be analyzed by use of qualitative and quantitative techniques including interviews, questionnaires and focus group discussions.
