ABSTRACT

The purpose of the study will be to find out and evaluate the role of feeding programme on primary school children in Kibwezi district. The study will also focus on the government's role on support of free primary feeding programme and how this feeding programme affects the learners performance. The target population will be primary school teachers and parents.

Although the district has a total of 276 public primary schools centres the researcher will random twenty of the centres. The researcher will use descriptive research design where interview, checklist for primary children and various questionnaires will be used in the research finding and recommendations will reflect a great importance, physical health of children improve, children come to school regularly and develop positive altitude of parents towards school programme findings may show that there is need for sustainable feeding programme in primary school centres.
