ABSTRACT

GOLDEN GATES INSTITUTE MANAGEMENT SYSTEM (GGEMIS)

This document covers all the relevant information relating to Golden Gates Institute Management System for Golden Gates Institute. This is an institution that currently uses a manual system in its functional operations on student management, recording and other services.

This new system therefore replaces this current system into a computerized one. The information was substantiated by the data collected from the data finding techniques and well summarized and documented.

GGEMIS tracks all the details of a student from the day one to the end of his course which can be used for all reporting purpose, tracking enrolment, progress in the course, completed semester, final exam results and all these was availed online for future references too.

The new system comprises the databases of courses offered by the college under all levels of graduation or main streams related to Golden Gates Institute courses, teachers or faculty details and students' details in all aspects. Different reports and queries can be generated based of vast options related to students, batch, course, quota, semesters and category and even for the entire college.
