ABSTRACT

The study was carried out with the aim of establishing the factors contributing to poor performance in English in Mutomo Zone. A brief statement of the problem was well written. The researcher used qualitative approach and the survey design to collect data. Questionnaires were used as tools. The researcher represented and analyzed the data that was collected infrequency table whereby major summary conclusion and recommendation were done basing them on information from the tables. The study found out the age of teachers teaching English the teaching and learning resources, the skills they use to teach learners. The literature review elaborated further about the teaching and learning materials. The researcher also looked into the teachers' attitude towards learners with learning difficulties in mutomo district Kitui County. The study intends to give an insight to teachers who teach English in the zone and also in the nation to enable them be able to deal challenges faced teaching and learning of English .the result of the study will also be used by the government to plan for the future education in the zone and in the nation as a whole.
