ABSTRACT

The purpose of this study is to investigate and establish why schools are not able to clear debts. The study will be guided by five objectives. To find out factors that significantly contribute to huge school debts; why we have devastated buildings in schools despite huge financing by government, parents and other stakeholder; establish whether proper budgets are maintained in schools; establish whether proper procurement and sourcing are properly done in school and finally to establish whether funds are received when needed.

The study adopted descriptive survey method, where a sample of 6 schools will be picked randomly, 3 departments, will be identified, the Administration (Principal) department accounts, and procurement.

The data collection will be done through the provision of self administered questionnaires. The second technique will be information from published and the unpublished sources.
