ABSTRACT

This study investigated the effects of television watching on English language development of primary school pupils in Katse Zone, Mumoni district. There was need to establish whether television watching improved the language development of children especially in English. The recommendation made included pupils be guide in watching educational programmes on TV for they improve both oral and listening skills of the children. Further research to be done on a wider area but on the same topic and to determine whether television watching had an effect on Kiswahili language development of primary school pupils.
