Abstract

This study was concerning challenges facing learners with learning difficulties in the mathematics performance.

The study was conducted in Kangare Zone of Kigumo District, Murang'a County. It was conducted in selected primary schools to represent others since it was challenging to visit all the primary schools in the area.

The purpose of the study was to investigate the general performance of primary schools in the county, various methods of learning applied and their effects on performance.

The researcher used questionnaires which gave more accurate results since the research method was intended to study the challenges facing learners with learning difficulties.

The researcher used these questionnaires and later analyzed and presented by use of tables.
