## **Abstract**

This research project was carried out in Githunguri Zone in Kiambu County. The researcher found out the factors leading to poor performance of learner with hearing impairment in Githunguri Zone, Kiambu County. This is because learners in the area perform poorly in both local and national examinations. To improve this, the researcher had to address the issue to the community and government of our country and address the importance of educating learner with hearing impairment in the society and to identify how their education can be improved. The researcher used survey method this is because it helps in collecting a lot of data from many people within a short period of time. In analysis the research presented the collected data in form of tables and charts.
