DEPARTMENT OF INFORMATION TECHNOLOGY

PROJECT TITLE: MIATHENE DAY SECONDARY SCHOOL MANAGEMENT SYSTEM.

BY: EDWIN MUTUMA

REG. NO: BBIT/2013/40121.

This project is submitted in partial fulfillment of requirement for the Mount Kenya University award of BACHELOR OF BUSSINESS INFORMATION TECHNOLOGY.

ABSTRACT

A computer based information system can be described as collection of hardware, software, data, people and procedures that work together to produce quality information. It has implications for student learning, classroom teaching, school administration and also parent involvement.

Many schools use manual systems hence causing a lot of time consuming and also poor quality of information. The purpose of this project will be to enhance management capabilities of teachers as well as the school administrators.
