ABSTRACT

The research will involve the study of the effects of mushrooming of private schools in urban set up on the quality of educators in Kahawa west region which is found in Kasarani sub county Roysambu constituency Nairobi County .Nairobi county is one of the main urban set up in Kenya. It has so many mushrooming urban areas due to the high population which abandoning rural areas to search for jobs in urban areas. The growing population in Kahawa west region has resulted to pressure on social amenities such as hospitals, schools. The study will adopt and use survey design to collect data from a number of people from private school in the area in order to determine the effects of mushrooming private schools in urban set up on the quality of education at Kahawa west region Nairobi County. The collection of the data will be done using questioners, which will be self-administered .The individuals and schools to be involved in the study will be sampled randomly The data collected will be sorted, organized analyzed and appropriate conclusions drawn. Possible recommendations will be proposed then forwarded to the relevant authority to be worked on
