OPTION) IN THE SCHOOL OF EDUCATION OF
MOUNT KENYA UNIVERSITY**

AUGUST 2014

ABSTRACT

The research will investigate on the relationship between jigger infestation and participation in school by pre- primary school and lower primary in Kiambu County.

The research therefore will investigate the following

- i. Relationship between jigger infestation and children's rate of school attendance
- ii. Effect of jiggers to children performance in outdoor activities
- iii. Effect of jiggers to children in their academic performance
- iv. The rate of school dropout due to jigger infestation
- v. The strategies of curbing jiggers in Kiambu County

In order to achieve this twelve schools in kiambu county will be sampled randomly with twenty four teachers and forty eight pupils participating.

Findings and recommendations made in this report will be helpful to the researchers, the head teachers, teachers and the community of Kiambu County and also to the government. Also the ministry of education will find this report to be of significance to them to raise strategies in helping children with jigger infestations in future.
