ABSTRACT

The main purpose of this research is to investigate Impact of increase on a country's currency on banking rates using Banks in Kenya as the case study. Random sampling was used in selecting respondents fit for the study. Data was collected from 45 different respondents who work in a bank and financial experts where a structured questionnaire was used in collecting data from the respondents. Data analysis was carried out using a statistical analysis software IBM SPSS version 20. From the analysis, it shows that the recent increase on the rise on Kenyan currency rate has greatly affected Banking rates in Kenya. This is seen from the increasing banking rates on different Banks in Kenya

Key words: Banking Rates, Kenyan Currency, Interests rates, Central Bank of Kenya (CBK)
