## ABSTRACT

The central problem of this study will be to determine the critical factors that have caused parity in performance in agriculture subject despite the schools following the same syllabus. Study will be conducted for selected sec schools in Mbeere district in Embu County where all levels of secondary schools will be involved. The researcher will use purpose sampling techniques using the criteria of performance in Agriculture for the precious five years results. A total of four schools one boys school, one girls school and two mixed will be studied, in equal number of Agriculture. Students will be selected from Form one to Form four for interviewing. All Agriculture teachers will also be interviewed in the four schools. Data will be collected using questionnaires and observation table analyzed using with descriptive and inferanted statistics. Altitude, Availability of resources and exposure as factors that contribute to the difference and performance in Agriculture subject in various schools.
