## ABSTRACT

The study was carried out in Nyeri Central District. It was found necessary to do it so as to find out whether knowledge management is done in schools and environmental scanning of current affairs. Data was collected from 3 provincial schools 13 district schools to represent 20 provincial and 69 district schools of Nyeri Central Districts. Questionnaires were provided to Principals, BOG, PTA, Field officers and subject teacher. Results analyzed were collected from provincial schools and district schools stakeholders. After collecting all this data, analysis was done using percentages, tables, pie chart and graphs. Findings of this study were determinant of knowledge management and environmental scanning in secondary schools. Suggestions were given to relevant stake holders of the schools that is the board of governors and the principal. The findings were compiled into concrete recommendation for implementation and other research.
