## ABSTRACT

This study determined the academic performance in science subjects of Kasue secondary school in Mutonguni Division, Kitui West District, Kenya. This study employed a descriptive survey method of investigation to determine the academic performance in science subjects in Kasue secondary school. This study involved 80 students where 40 were from four north and 40 from form four south, 48 male and 32 female were involved in the study. This study revealed that the mean age of student considered was 18 years. The level of academic performance was good (40.864%). It was also revealed that there was no significant difference in the level of academic performance between male and female students in science. Generally the performance of both male and female in science subjects was below average.
