ABSTRACT

The provision of quality education and subsequent high performance in school is inevitable for the realization of the millennium development goals and Vision 2030. The purpose of the study was to establish Constraints facing the implementation of free primary education in Tigania West constituency in Meru County, the specific objectives includes, To investigate the extent to which school administration, availability of teaching and learning resources, teachers attitudes and students is a constraining factor on the implementation of free primary education in Tigania West District, Meru County. It is envisaged that the findings of this study will have both theoretical and practical implications for future of implementation of free primary education. The study will adopt exploratory approach using a descriptive survey design to investigate the current situation with regard to factors constraining the implementation of free primary education. The target population will comprise of 19 public secondary schools with a total population of 950 pupils students 180 teachers 19 head teachers. Data Obtained from interviews, questionnaires and observation guidelines will be analyzed using the descriptive statistics in the statistical package for social sciences (SPSS). Data from questionnaires will be coded, tabulated and analyzed using descriptive statistical tools such as measures of central tendency (mean, mode and median), frequencies, standard deviation and percentages. Data derived from interviews and observation will be analyzed qualitatively and then presented theoretically in the interpretation of the data collected.
