ABSTRACT

The study was on the influence of behavior disorders on learning and performance of secondary school Students in Kununi Division, Igembe South Sub-county, Meru County. The study was carried out using survey design. Five secondary schools were selected for the study through stratified in order to involve all the locations in the zone. Principals and parent were picked through purposive sampling while teachers and students were selected through simple random sampling. Data was collected by use of questionnaires, interview schedules, and observation checklists. The collected data was analysed using tables, percentages, graph and pie-charts in chapter four. Chapter five contained the summary of the findings, conclusions made by the researcher and the recommendations.
