ABSTRACT

The study has assessed the factors affecting Internal Auditor's performance in health sector in Kenya using validated assessment tool (questionnaires), 78 respondents both professional and administrative staffs in Kenyatta National Hospital were assessed including accountants, finance managers, internal auditors, external auditors and administrative staffs.

The prevalence of motivation in health sector was less than 10% and above 80% of professionals workers in different departmentals were not satisfied with the current motivational strategy thus affecting their performance.

The study intended to find out how management structure, creative accounting, peer review and training affect performance of the Internal Auditors as they are employees appointed by the top management. The study was conducted using descriptive research design to answer the current status of the subject in the study.

It targeted a population of 300 human workforce and a sample size of 90 employees was obtained using simple random sampling probability technique.

The study found out that; if a new management strategy is considered, government, societies, employees and management will benefit.
