DEPARTMENT OF INFORMATION TECHNOLOGY

PROJECT TITLE:

MOUNT KENYA UNIVERSITY STUDENT VOTING SYSTEM

BY: KINYANJUI WAMBUI JOYCE

Reg. No: BBIT111/00275

This project is submitted in partial fulfillment of requirement for the Mount Kenya University award of BACHELOR OF BUSINESS INFORMATION TECHNOLOGY

ABSTRACT

The word vote means to choose from a list or to elect. The main goal of voting is to come up with the leaders of the peoples' choice. The manual voting system is what was used in selecting the student council; it encountered problems which included; rigging of votes, limiting the number of voters due to time factor, miscounting of votes among many others.

This computerized voting system seeks to address the above issues to achieve free and fair elections. Students will be trained on how to use the system.
