## **ABSTRACT**

This study aims at addressing the effect of consumption of illicit brews on the education of the young generation. It shall focus its attention on the students, teachers and parents in Maragi location, Kiharu District in Murang'a County.

Several complains have been leveled against the consumption of illicit brews which are destroying young people, breaking families, causing deaths and causing low productivity of the region.

The research objectives and research questions will be formulated in line with the research title. The study shall also present the significant of study, giving details of the beneficiaries of the study. A conceptual framework designed in the line with the objectives and the research title to aid in the realization of relationship of independent variables and dependent variables shall be presented. The study shall capture different sources of information in the light of literature review. This review shall help in shedding light about other research studies that would be carried out in the study. A critical review will be presented in line with pointing out the evident points of errors of omission in the earlier study. Conclusion of the study shall be presented, as are the gaps to be filled by the study. The study will adopt a survey research methodology. The respondent will fill a questionnaire that shall be employed for data collection.
