ABSTRACT

The main purpose of the study is to analyse whether motivation for teachers can improve academic performance. The statement of the problem, specific objective of the study, research question, significance of the study and the scope of the study have all being handled well in chapter one. The literature of the subject matter, critical review, conclusion and identification of research gaps have been extensively covered in chapter two of the report.

The instrument used to collect data was questionnaires. The data was collected using qualitative and quantitative design. The result of the study were presented using tables, pie-charts and percentage from which co-relation between the selected themes were discussed
