## **ABSTRACT**

The purpose of the study has established the effects of adoption of computerized accounting systems on financial management in County governments. In addressing this, the researcher observed the following objectives. Information technology computerized accounting, staff motivation, organization culture and infrastructure. However the beneficiaries of the study are Nairobi County government, other county governments, the central government and other researchers.

The research adopted descriptive research design and stratified random sampling techniques respectively. The study included 80 members of staff from which a sample size of 40 was drawn. A questionnaire was used to collect data, which was analyzed using qualitative and quantitative techniques and then presented in tables and figures.

These findings enabled Nairobi county government to cite effects of computerized accounting in financial management which fits the organization and employees so as to improve their performance. The study also helped the author know more about effects of computerized accounting in financial management and was able to assist other researchers in other related studies. Students and management researchers also benefited through references by obtaining copies from the libraries.
