## **ABSTRACT**

### **Purpose of the study**

The study was aimed at establishing the factors affecting learning in schools in jarajila zone fafi district that leads to poor performance of learners in the zone.

The samples used in the study were learners from schools in jarajila zone, parents, community, teachers and educational officers in the zone.

The research instruments used were interviews schedual. Questoiniers to children, parents and teachers. The researcher requested for permission to go and visit various schools for the study where he created rapport with the respondent and discussed with them on date time and venue. The researcher kept the agreed time and collected raw data himself through use of bar graphs, pie chart and tables that guided him to make suitable conclusion. Factors affecting learning should be discussed in details because they are the main cause of school dropout and poor performance in jarajila zone fafi district, Garissa County.
