## ABSTRACT

This research project will cover the factors that affect the delivery of instruction by teachers in secondary schools in Garissa County.

This project will involve a thorough investigation on the impact of the teachers in the county of Garissa and should give a scope as to whether it is the teachers, the students or the community that is to blame for the poor performance in KCSE examinations in the region and should also give a highlight on what should be done to improve the situation and ensure the region registers improvement in their performance in other examinations in the near future.

Chapter 1 of this research introduces the general nationwide outlook of the performance in the past national examinations more so the KCSE examination as is the area of this case study. It will give a foundation of all the literature on the topic of study. Here, the researcher states the problem and lays the objectives of the study. This involves formulating research questions and analyzing the limitations and delimitations of the research.

Chapter 2 highlights all the necessary literature behind the study. These includes the views of other scholars on factors that affect the general performance of a certain institution etc and theories articles, quotations media reports etc which also reveal the poor performance of the county being studied.

In chapter 3, the methodology, location of the study, population sample details, methods of data collection and the analysis and presentation of data are highlighted.
