ABSTRACT

This research will assess the impact of cash transfer on the welfare of the elderly above 65 years and their household by establishing: how cash transfer is delivered to beneficiaries; some of the challenges faced by the older person in accessing the stipend or as are result of being a recipient of cash transfer program and finally on the impact of the cash transfer program on the socio-economic welfare of the older person and that of their households. The research will use a survey design. Sampling will be done using proportionate sampling. Both primary and secondary data collection methods will be used. Data will be analyzed descriptively using Statistical Package for Social Scientists. Presentation will be done using graphs pie charts and diagrams.
