ABSTRACT

The purpose of this study was to investigate in to the effect of student absenteeism on their performance in Nguutani Secondary School in Mwingi West district,Kitui county.so as to create awareness to the sponser,parents and teachers on the effect of absenteeism on the performance of the student in formative exams.

The main aim of this study was to examine the effect of absenteeism on the performance of the students and therefore suggest an alternative solution to the parents and teachers to enable them curb the situation before it destroys the life of the students since this will always be reflected in the certificate of the students.

This study was to enlighten all the stake holders of the education sector on the need to avoid situations which could lead the students to miss classes.

Pie charts and tabulated data tables were used by the researcher to analyse the data and come up with information which enabled the researcher to make conclusion and generalize the finding to other situation.
