## ABSTRACT

Mobile schools in the world are managed by different national and international agencies. International institute of rural reconstruction is one of the agencies running mobile schools. The agency was founded in 1960 by James Yen Silang. It operates in Asia and Africa. Kenya is among the seven countries in the world and one of the four in Africa in which the international institute of rural reconstruction works to ensure children from pastoralist community access education. The research aimed at establishing the impact of mobile schools on academic performance in Merti district, Isiolo County. The researcher objectively found out; Challenges facing children in pastoralist community in their effort to access education, Contributions of mobile schools in providing quality educating to children in pastoralist community, Impact of mobile schools on academic performance in Merti district, Challenges mobile schools are facing in their effort to provide quality education to children of pastoralist community. The researcher reviewed related literature of other authors who have written on the same topic. This research relied on report from resources with relevant information. The research used different strategies to collect information for this research project. Interviews and questionnaires are but just among strategies used. Qualitative analysis was used to analyze and provide detailed information about impact of mobile schools on academic performance in Merti district. Last but not least, the research proposal indicated and explicitly showed challenges facing pastoralist children in accessing education, contributions of mobile schools in providing education, impact of mobile schools on academic performance and challenges facing mobile school.
