OCTOBER 2012

ABSTRACT

The purpose of this study is to explore the factors influencing mathematics performance in lower primary in Ngewe Unit Ruiru Zone, Ruiru District. This is because in this area of study mathematics performance in lower primary is wanting and need to be addressed. The researcher will target 33 teachers and 1500 learners from 10 centres within Ruiru Zone. The researcher will use simple random sampling technique to arrive at the same size. Qualitative and quantitative research design will be used to collect data. The tools the researchers will be using are observation, schedules, questionnaires and tests.

This study is significant in that it will provide valuable information to improve the standard of education particularly in Mathematics. It will also help all the stakeholders of Education and people of good will put their efforts together and assist further in improving the education programmes.
