ABSTRACT

The purpose of the study is to investigate the main causes of the poor performance in Tseikuru district. The study focuses on social, economic political, emotional and environmental factors that lead to poor performance.

The study will employ a survey method of research and will be only in Tseikuru district, Kitui County.

It will target children who are 14 – 18 years from six schools three labeled as performing well and three poorly. The study will use both purposive and simple random sampling methods. Graphs and charts will be used to present data.
